

What is Links to Learning?

Links to Learning is a women's fundraising group at the David Posnack Jewish Day School that supports our school's ever-evolving technology needs. Since our founding in 2004, the goal of Links has been L'Dor V' Dor - women through the generations working together and linked for the common cause of enhancing our children's education. Over the past years, *Links to Learning* members have raised funds to help provide the newest educational tools and state-of-the-art equipment to our students and faculty, as well as much-needed training and continuing education for all of our staff.

This year Every *Links* member receives brunch at our annual event and a specially selected *Links* charm, symbolizing her commitment to classroom technology. With each additional year of membership, our members receive a new charm to reflect their link to Posnack and their children's and grandchildren's Jewish education.

As we strive for 21st century-learning at Posnack, an organization like *Links to Learning* is an integral partner in promoting academic excellence. Please join us and get "Linked" this year!
